Wireless Key-Card Switch

thermokon[®]
HOME OF SENSOR TECHNOLOGY

Datasheet

Subject to technical alteration
Issue date: 10/27/2020 • A112

» APPLICATION

Wireless switch for key card activation for regulation of lighting and air-conditioning applications in room control. The self powered wireless technology enables a flexible installation on glass and wall plaster via double-sided adhesive pads or screws.

» SECURITY ADVICE – CAUTION

The installation and assembly of the device should only be performed by authorized personnel.

The product should only be used for the intended application. Unauthorised modifications are prohibited! The product must not be used in relation with any equipment that in case of a failure may threaten, directly or indirectly, human health or life or result in danger to human beings, animals or assets. Ensure all power is disconnected before installing. Do not connect to live/operating equipment.

Please comply with

- Local laws, health & safety regulations, technical standards and regulations
- Condition of the device at the time of installation, to ensure safe installation
- This data sheet and installation manual

» PRODUCT TESTING AND CERTIFICATION

Declaration of conformity

The declaration of conformity of the products can be found on our website <https://www.thermokon.de/>.

» NOTES ON DISPOSAL

As a component of a large-scale fixed installation, Thermokon products are intended to be used permanently as part of a building or a structure at a pre-defined and dedicated location, hence the Waste Electrical and Electronic Act (WEEE) is not applicable. However, most of the products may contain valuable materials that should be recycled and not disposed of as domestic waste. Please note the relevant regulations for local disposal.

EasySens® - airConfig

Basic information about EasySens® radio and about general usage of our airConfig software, please download from our website.

» OVERVIEW OF THE RADIO TELEGRAMS

EEP

The structure of the data contained in the telegram can be found in the EEP (EnOcean equipment profile) list provided by the EnOcean Alliance.

» TECHNICAL DATA

Radio technology	EnOcean (IEC 14543-3-10), transmission power <10 mW EEP F6-04-01
Frequency	902 MHz
Power supply	maintenance-free, electrodynamic energy generator
Transmission interval	at status change
Enclosure	PC, pure white
Protection	IP20 according to EN60529
Ambient condition	+32..+104 °C, max. 85% rH non-condensing
Mounting	to be mounted flat onto the surface using adhesive foil or screws

» MOUNTING ADVICE

Mount key card switch to the smooth wall surface or flush mounting box using double sided tape or screws. The retaining screws may only be tightened hand tight.

The devices are supplied in operational state. Make a flat surface before mounting on rough surfaces. Unevenness can lead to a malfunction of the transmitter. Observe the mounting position of the transmitter during installation. Remove the trim plate from the key card assembly.

During assembly, ensure the correct orientation (top / bottom) of the key card switch.

» COMMISSIONING

To make sure that the switch information is interpreted correctly at the receiver, it is necessary to learn-in the key card switch into the receiver. This is done automatically by actuation of the key card switch.

Please put the receiver into the learning mode. Afterwards, the key card switch must be activated by inserting a suitable card.

Please note, that for the activation, the card must at least be inserted for 5 seconds to complete the teaching-in procedure correctly.

Details to be found in the corresponding software documentation of the receiver.

» DIMENSIONS (IN)

3.15 x 3.15 x 0.79 in.

(80 x 80 x 20 mm)

» ACCESSORIES (INCLUDED IN DELIVERY)

Adhesive foil for fixing the base plate
